

QUALITY ASSURANCE

A proven track record for quality assurance in wireline operations tender support, job planning, preparation and execution at the wellsite. Our value comes from our knowledgeable and experienced consultants.

REMOTE WITNESS PORTAL

Our remote witness portal is the first of its type in the Industry, providing you and your team members access to real-time quality control reports, time breakdowns, daily reports, log-data and QHSE reporting.

FORMALISED PROCESS

one&zero has developed a proprietary QC checklist database of services to ensure a consistency in QA/QC processes which will not be found elsewhere. Our clients can input their own requirements, enhancing wellsite QC.

CONTINUOUS IMPROVEMENT

A structured process for ensuring post-job lessons learned are remembered. We measure service provider performance to facilitate continuous improvement and ensure that you receive maximum value.

TENDER SUPPORT

Successful operations start at the planning stage. Our systematic methodology can evaluate and benchmark service provider tender bids in relation to your operational requirements, so that service provision meets expectations.

Experience

All of our consultants have over 10 years of wireline experience, bringing invaluable knowledge to your operations

Trust

We work to build relationships with our clients. As your eyes and ears at the wellsite we believe this to be the key to success

Process

A redefined approach to log witnessing with unique workflows and processes to ensure consistency in data acquisition
